

Biography of Allan Skodowski

Al Skodowski heads the engineering and operations group for the Midwest Region. He oversees all aspects of overall Facilities Management, including capital improvements, utility management/deregulation and national accounts.

Al has been instrumental in managing Transwestern's ENERGY STAR program for the Midwest Region. With Al's assistance, Transwestern's Midwest region benchmarked their entire portfolio in ENERGY STAR Portfolio Manager and several have achieved ENERGY STAR labeling as a result.

Al has also been instrumental in spearheading Transwestern's green building initiative with the U.S. Green Building Council (USGBC)'s Leadership in Energy and Environmental Design for Existing Buildings (LEED(r)-EB). He worked directly with Chicago Transit Authority's headquarter building in Chicago, Illinois and the Wellington E. Webb Municipal building in Denver, Colorado. Both buildings have been awarded LEED(r)-EB Gold certification. He is currently managing Transwestern's LEED(r)-EB Portfolio pilot with USGBC that includes 51 buildings. Al is a LEED(r) Accredited Professional.

In addition to leading Transwestern's green initiatives, Al is co-chairing the BOMA International Energy and Environment Committee. This prominent committee focuses on energy and climate change issues that are facing the commercial real estate industry. He began his two-year term this summer following BOMA International's 100th Year Conference in New York.
